*Alpen*

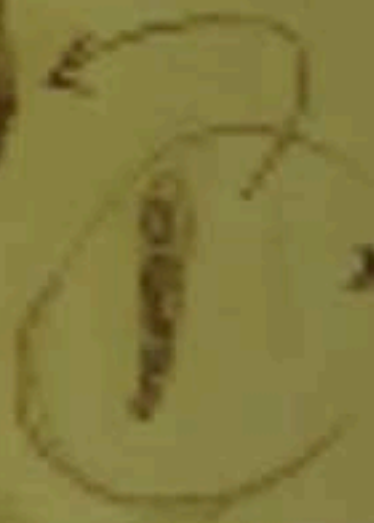

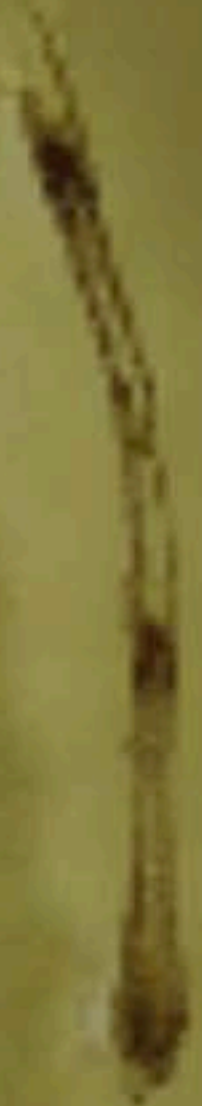

Let the part below  
- some come to a small spot  
that is not seen by the eye  
eyes. I do not believe it.

The center captures  
to date because  
geology is seen in  
the Canyon -

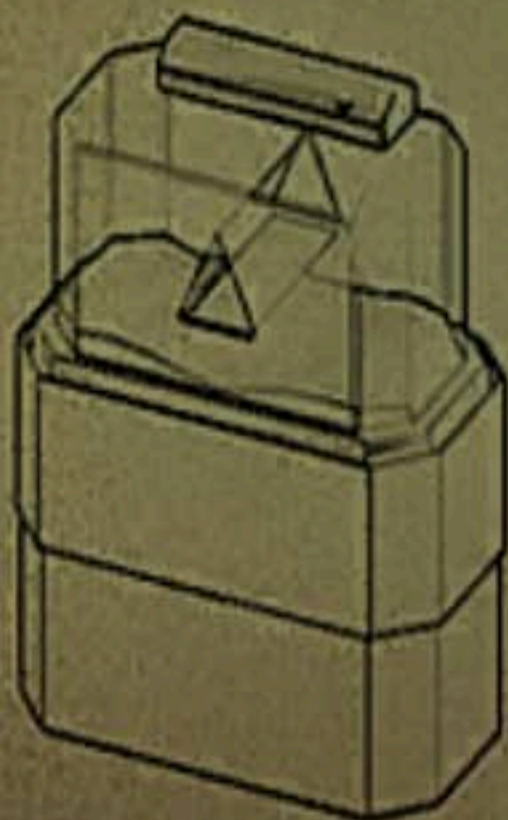

He is large by far  
- than any I had  
- seen.

# Fry Man Safe Haven Series

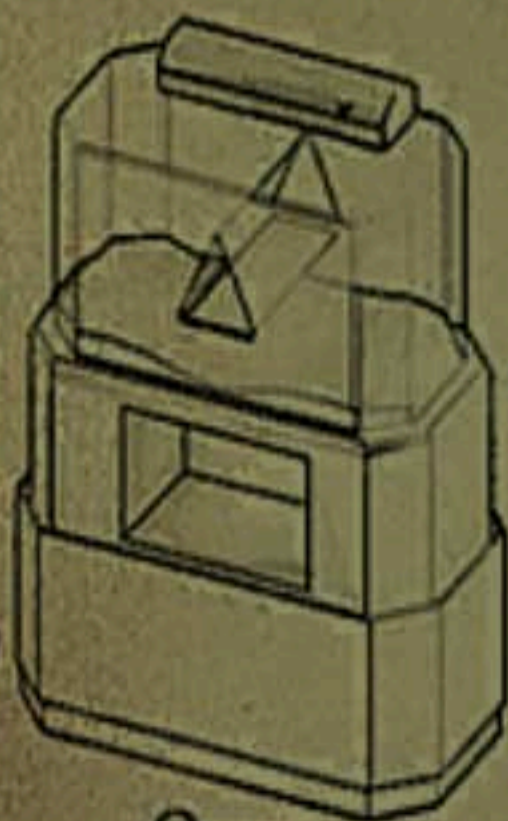

Closed

**Warranty Information Card:** Thank you for your purchase of the Fry Man Safe Haven III. As with all of our aquariums, the Safe Haven models come with a one year unlimited warranty. In order to take full advantage of the Fry Man guarantee, please fill out the registration card you received with your aquarium.

**Accessing the Safe:** For Safe Haven II models, the lower portion of the tank is accessed via the "safe" button. This safe button is located directly above the patented "central feeding hole" on the back side of the aquarium.

For Safe Haven III and IV models, the "safe" button is built into the light on/off switch. Simply press the light switch for longer than three seconds and the lower portion of the tank will open.

Open

Safe Haven IV model owners will also be required to enter a combination in order to open the "safe" portion of the tank after the lower portion has been raised. The combination from the factory is the last six digits of your registration number. Of course, the combination can be changed at any time by following the instructions on the separate insert entitled "Changing Your Safe's Combination".
